Practical Examples and HowTos Lets delve into a few key concepts with practical examples

1 Solving Quadratic Equations Consider the equation $x^2 - 5x + 6 = 0$ **Factoring Method** We can factor this equation as $(x - 2)(x - 3) = 0$ This gives us solutions $x = 2$ and $x = 3$ **Quadratic Formula** For equations that dont factor easily use the quadratic formula $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$ where a , b , and c are coefficients of the quadratic equation $ax^2 + bx + c = 0$ In our example $a = 1$, $b = -5$, and $c = 6$ Plugging these values into the formula will also yield $x = 2$ and $x = 3$ **Visual** A simple graphic showing the parabola of $x^2 - 5x + 6 = 0$ intersecting the x-axis at $x = 2$ and $x = 3$

2 Graphing Linear Equations Consider the equation $y = 2x + 1$ This is a linear equation in slope-intercept form $y = mx + b$ where m is the slope 2 and b is the y-intercept 1

Plotting the y-intercept Start by plotting the point $(0, 1)$ on the y-axis **Using the slope** The slope of 2 means that for every 1 unit increase in x , y increases by 2 units From $(0, 1)$ move 1 unit to the right and 2 units up to plot the point $(1, 3)$ Repeat this process to plot more points **Drawing the line** Draw a straight line through the plotted points **Visual** A graph showing the line $y = 2x + 1$ clearly showing the y-intercept and slope

3 Solving Systems of Equations Consider the system $x + y = 5$ and $x - y = 1$

Elimination Method Add the two equations together to eliminate y : $2x = 6$ which gives $x = 3$ Substitute $x = 3$ into either equation to find $y = 2$ The solution is $(3, 2)$

Substitution Method Solve one equation for one variable eg $x = 5 - y$ from the first equation Substitute this expression into the other equation and solve for y Then substitute the value of y back into either equation to find x **Visual** A graph showing the two lines intersecting at the point $(3, 2)$

Summary of Key Points Break down lessons into smaller parts Utilize all resources available within Odysseyware Consistent practice is crucial for success Dont hesitate to seek help when needed Effective time management is key
