a surge of new molding technologies is transforming plastics processing and material forms to the highly efficient integrated manufacturing that will set industry standards in the early years of this century this book is a survey of these technologies putting them into context and accentuating opportunities the relations among these technologies are analyzed in terms of products materials processing and geometry

this is a self contained collection of data and information on applications of fluoropolymers components for corrosion control in chemical processing industries due to their superior properties fluoropolymers have been rapidly replacing metal alloys for preserving the purity of

processing streams in the chemical processing plastics food pharmaceutical semiconductor and pulp and paper industries

selected papers from the 2009 international conference on manufacturing science and engineering icmse 2009 26 28 december 2009 zhuhai china

this is the second of a two volume series of books about fluoroplastics volume 1 covers the non melt processible homopolymers requiring non traditional processing techniques volume 2 is devoted to the melt processible fluoropolymers their polymerization and fabrication techniques including injection molding wire tube and film extrusion rotational molding blow molding compression molding and transfer molding both a source of data and a reference the properties characteristics applications safety disposal and recycling of melt processible fluoropolymers are comprehensively detailed for immediate use by today s practicing engineering and scientists in the plastics industry students will benefit from the book s arrangement and extensive references

fluoroplastics volume 2 melt processible fluoropolymers the definitive user s guide and data book compiles the working knowledge of the polymer chemistry and physics of melt processible fluoropolymers with detailed descriptions of commercial processing methods material properties fabrication and handling information technologies and applications also including history market statistics and safety and recycling aspects both volumes of fluoroplastics contain a large amount of specific property data useful for users to readily compare different materials and align material structure with end use applications volume two concentrates on melt processible fluoropolymers used across a broad range of industries including automotive aerospace electronic food beverage oil gas and medical devices this new edition is a thoroughly updated and significantly expanded revision covering new technologies and applications and addressing the changes that have taken place in the fluoropolymer markets exceptionally broad and comprehensive coverage of melt processible fluoropolymers processing and applications provides a practical approach written by long standing authorities in the fluoropolymers industry thoroughly updated and significantly expanded revision covering new technologies and applications and addressing the changes that have taken place in the fluoropolymer markets
